

Application for Research Specialist (Part-Time Student Job)

I am studying MSc Computer Science at DTU and I am very interested in the Research Specialist student role at Bloom in Ballerup. Coming from a software engineering background with prior experience in healthcare and finance companies (GE Healthcare, Swiss Re, American Express), I bring a practical understanding of IT roles, technical skill sets, and candidate evaluation.

Technical Interviewing & Candidate Screening Experience:

In my previous full-time software developer roles, I participated in conducting technical interview rounds to evaluate candidate profiles, technical competencies, and problem-solving skills. Having been on the interviewing side of tech hiring, I understand what distinguishes strong candidates in software engineering, data, and IT architecture.

This experience allows me to systematically define search criteria with senior consultants, evaluate technical profiles on LinkedIn and candidate databases, and identify qualified candidates effectively for Bloom's clients. Working 8–15 hours per week with flexible arrangements fits well alongside my MSc studies at DTU.

You can view my personal and academic projects and CV on my portfolio:
