

Application for Junior Consultant — IT Support of Procurement Programs

I am studying MSc Computer Science at DTU and I am very motivated to apply for the Junior Consultant position at DSB supporting major IT procurement programs (such as *Fremtidens S-bane*). Coming from a software development background in corporate environments (GE Healthcare, Swiss Re, American Express), I bring strong analytical skills and structured working habits.

How My Background Supports DSB's Program Office:

Having worked as a software developer, I am used to working with complex IT architectures, querying SQL databases, writing technical documentation, and tracking project deliverables. I enjoy organizing operational data into clear, structured formats to help project leads and senior consultants make informed decisions.

I am eager to join DSB in Høje Taastrup because you drive Denmark's most vital public transport infrastructure and digitalization projects. Working 15–20 hours per week with flexible arrangements fits well alongside my MSc studies at DTU, allowing me to support your program office while contributing long-term value.

You can view my personal and academic projects and CV on my portfolio:
