

Application for Student Assistant in Data and Business Processes

I am studying MSc Computer Science at DTU and I am writing to apply for the Student Assistant position in the Financial Secretariat at Dansk Erhverv. With prior software engineering experience in healthcare and finance (GE Healthcare, Swiss Re, American Express), I bring a strong technical background in data management, system logic, and process documentation.

How My Technical Background Supports the Financial Secretariat:

- **Data Validation & Quality Assurance:** In my prior software developer roles, I regularly worked with SQL databases to extract, validate, and structure complex datasets, ensuring high data accuracy across systems.
- **Systems Understanding & Process Mapping:** I am used to analyzing how data flows across different organizational functions, mapping business logic, and writing clear technical documentation for team members.
- **Data & Technical Skills:** Working daily with Python, SQL, and reporting tools enables me to quickly adapt to Dansk Erhverv's internal member databases, financial reporting, and ad hoc analytical tasks.

I am motivated to join Dansk Erhverv to support your team in delivering accurate, timely data services for over 18,000 member companies. Working 15 hours per week at C.F. Tietgens Hus fits very well alongside my MSc studies at DTU, and I offer flexibility during busy periods and exams.

You can view my personal and academic projects and CV on my portfolio:
