

Application for Research Specialist (Part-Time Student Job)

I am studying MSc Computer Science at DTU and I am very interested in the Research Specialist student role at Bloom in Ballerup. Coming from a software engineering background with prior experience in healthcare and finance tech companies (GE Healthcare, Swiss Re, American Express), I bring a practical understanding of IT roles, technical skill sets, and industry terminology.

How My Tech Background Supports Search & Talent Sourcing:

Having worked directly on software development projects, I understand the practical nuances between different IT roles—such as backend developers, data engineers, and AI/ML specialists. This technical background allows me to systematically define search criteria, evaluate candidate profiles on LinkedIn and databases, and communicate effectively with tech professionals.

I am motivated to join Bloom because you specialize in headhunting for IT and high-tech companies across Denmark. Working 8–15 hours per week with flexible arrangements fits well alongside my MSc studies at DTU, allowing me to support your senior consultants in Ballerup and Aarhus while learning 'The Bloom Way'.

You can view my personal and academic projects and CV on my portfolio:
