PROFILE SUMMARY

Motivated and reliable MSc student at the Technical University of Denmark (DTU), starting Computer Science and Engineering studies in September 2025. Seeking part-time work in retail, customer service, cleaning, or IT. Skilled in communication, teamwork, problem-solving, and adapting to fast-paced environments. Fluent in English, intermediate in Danish, and committed to delivering high-quality results with flexible availability.

Currently **based in Denmark** and **actively seeking job opportunities** to contribute my skills immediately while preparing for academic progression.

PROFESSIONAL EXPERIENCE

Jan 2023 - Dec 2023 | Infinite Computer Solutions, Bengaluru | Software Developer

- **Customer Name:** GE Healthcare, Bengaluru, India
- I collaborated with a team to develop an internal application that simplified license management for hospital equipment like MRI and CT scanners. The goal was to make it as easy as managing a software subscription—enabling staff to activate, update, or remove licenses without technical expertise.
- I built tools to streamline installation and updates, reducing downtime and manual work, especially for equipment already in use across hospitals. Working in a high-pressure environment, I coordinated closely with both technical and non-technical teams to ensure smooth, on-time delivery.
- A key outcome was freeing hospital staff from the complexity of license management. Each year, we delivered new features and security upgrades to keep the system reliable and user-friendly.

Feb 2019 - Jul 2022 | Tech Mahindra Limited, Hyderabad | Software Developer

- **Customer Name:** Swiss Re, Zurich, Switzerland
- Developed a user-friendly app, SwiftMX, that converted cash management business team requests into clear instructions for a third-party tool (Apex) used to purchase bonds and securities, enabling Swiss Re's business team to securely and efficiently manage insurance funds, akin to simplifying complex orders for a banking system.
- I contributed to multiple projects for the third-party TRAX app, used by our business team to initiate payments with standard templates.
- Developed testing tools for annual TRAX app upgrades, transferring data and configurations from the old version to the new one, generating reports on transfer success rates to ensure seamless transitions and system reliability.
- Built an encryption solution for a middleware project, securely routing payment files (e.g., salary or insurance payments) initiated via TRAX through multiple systems, including Swift, to the bank, ensuring accurate and protected transactions.

Sep 2016 - Jan 2019 | Tata Consultancy Services, Hyderabad | Junior Engineer | Graduate Trainee

- **Customer Name:** Amex Creditcard Mexico Market
- Developed a user-friendly PDF credit note statement for American Express customers in Mexico, replacing less accessible XML documents to enhance the internet banking experience.
- Coordinated the project from planning to deployment, collaborating with teams to design, build, test, and launch the feature, ensuring customers could easily access their statements online.
- Developed a user-friendly mini-banking app as a training project, enabling simple deposit and withdrawal operations, like a basic online banking interface.

- Ensured accurate and secure transactions by carefully validating user inputs, maintaining high-quality standards.
- Collaborated with mentors and peers to design, build, and test the app, demonstrating teamwork and problem-solving to deliver a reliable solution.

June 2016 - April 2017 | Spencer’s Supermarked, Hyderabad | Butiksmedarbejder

- **Kassearbejde:** Efficiently handled checkout tasks, including scanning items, processing payments, and issuing receipts, while ensuring accurate till reconciliation.
- **Butiksrengøring:** Ensured the store area was clean and tidy, contributing to a pleasant shopping environment.
- **Produktplacering:** Actively contributed to maintaining attractive product displays and ensured that items were visible and easily accessible to customers.

EDUCATION BACKGROUND

Qualification	Institution	Year	Credentials
Master's degree in computer science	Technical University of Denmark (DTU)	2027	S252744
Bachelor's degree in information technology	RVR & JC College of Engineering (Acharya Nagarjuna University)	2016	Y12IT865

Skills & Competencies

Technical: Java | Python | Spring Boot | Spring Cloud | Hibernate | Kafka | REST APIs | Microservices | Docker | Kubernetes | Git | Maven | CI/CD | AWS (EC2, IAM, S3) | Oracle DB | Linux | Windows PowerShell | ServiceNow | Jira | Rally | Testing (Unit & Integration)

Soft / Transferable Skills: Teamwork | Communication | Problem Solving | Agile (Scrum & Kanban) | Attention to Detail | Process Improvement | Fast Learner | Cross-Team Collaboration | Working Under Pressure

CERTIFICATIONS

Oracle Java Certification - Java 11 | Lean Six Sigma Yellow Belt | TOEFL iBT - Score: 94 / 120

HOBBIES & INTERESTS

- Enjoy badminton and cricket | Stay updated on tech news and world politics.
- Passionate about new technologies & self-growth | Hardworking, thriving on challenges.

LANGUAGES KNOWN

- English, Telugu, Danish (Intermediate)
