

## Application for Student Assistant in Data and Business Processes

---

I am studying MSc Computer Science at DTU and I am interested in the Student Assistant role in the Financial Secretariat at Dansk Erhverv. Having worked as a software developer in healthcare and finance companies before starting my master's degree, I have practical experience handling data, writing SQL queries, and documenting business processes.

In my previous developer roles, a big part of my daily work was ensuring data quality, checking reports for accuracy, and organizing unstructured information into clear system formats. I enjoy working systematically with data and understanding how different business processes connect across an organization.

I am motivated to join Dansk Erhverv because you support over 18,000 member companies across Denmark. Working around 15 hours a week at C.F. Tietgens Hus fits very well alongside my studies at DTU, and I am happy to adjust my working hours during busy times and exams.

You can view my personal and academic projects and CV on my portfolio:
