

Application for Junior Consultant — IT Support of Procurement Programs

I am studying MSc Computer Science at DTU and I am very motivated to apply for the Junior Consultant position at DSB supporting major IT procurement programs (such as *Fremtidens S-bane*). Coming from a software engineering background with prior experience in large-scale corporate environments (GE Healthcare, Swiss Re, American Express), I bring strong analytical skills, structured working habits, and practical IT experience.

How My Experience Supports DSB's Program Office:

Having worked as a software developer, I am comfortable with IT system architectures, SQL data extraction, reporting tools (like Power BI), process documentation, and risk management workflows. I enjoy translating complex technical and operational data into clear, structured insights to help program managers and senior consultants make informed decisions.

I am eager to join DSB in Høje Taastrup because you drive Denmark's most vital public transport digitalization and infrastructure projects. Working 15–20 hours per week with flexible arrangements fits perfectly alongside my MSc studies at DTU, allowing me to take ownership of program office tasks while contributing long-term value.

You can view my personal and academic projects and CV on my portfolio:
